

OPTIONS STAINLESS SHOWER/SANI CHAIR

SOUTHPORT FLEXI SEAT

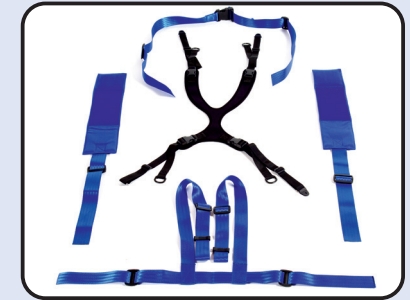

“This split style seat has been designed to offer flexibility to user’s, which cannot be met by the standard horse-shoe or ring seats. The seat is fully adjustable for various size posterior aspects. It is the first fully contoured shower seat available on the market. The rear of the seat is shaped to support the pelvic region and the front gives full support to the legs. This innovative seat design helps to provide an optimum seating position, especially for those clients who need comfort as they spend long periods of time upon a shower seat. The whole unique design of the shower chair with its shorter back canvas and split style contoured seat with adjustable slide mechanism, can help facilitate easier personal care”.
